The Book Surgeons and Gynecologists are hailing enthusiastically!
Te Linde . . . OPERATIVE GYNÆCOLOGY

by Richard W. Te Linde, M.D., Professor of Gynecology, Johns Hopkins University;
 Chief Gynecologist, Johns Hopkins Hospital.

- BECAUSE**
- It contains the most important material to appear in this field in a decade . . .
 - It is designed as a working manual, to increase operative skill, as well as a source book for study and reference . . .
 - Its illustrations are magnificent—James Didusch and six other prominent artists have contributed over three hundred drawings, based chiefly on sketches made at the operating table . . .
 - Besides a complete coverage of its field in both pre- and post-operative aspects, it correlates endocrinology, pathology, and minor psychiatry with gynecologic surgery, in a manner designed for practical application.
- 751 pages. 309 illustrations in black and white. 15 subjects in Full Color on 9 plates. **\$20.00**
